

Adolfo Zambrana

Hello, my name is Adolfo, and I am looking to grow in the world of FrontEnd programming and graphic design. I am a dynamic and self-taught person who seeks to find new personal and professional challenges in each project.

I mainly work with technologies such as Next.js, React, TypeScript, SASS or Tailwind among others. In the field of visual design I work with the complete Adobe pack, and the Figma design program. I am also familiar with working with Agile Scrum work methodologies.
